

Name: \_\_\_\_\_ Score: \_\_\_\_\_

## Rounding to Nearest Ten

Look at the ones place. If that digit is a 0, 1, 2, 3, or 4, round down. When you round down, you will leave the tens digit alone. If that digit is a 5, 6, 7, 8, or 9, round up. When you round up, you will add one more to the tens place digit. CHANGE THE ONES DIGIT to a ZERO. Example: 19 is rounded UP to 20.
